PROFILE

Frontend Developer with experience building dynamic, single-page applications (SPAs) using Angular.Combines a strong proficiency in modern JavaScript frameworks with a unique background in linguistics, leading to a meticulous approach to code structure and user experience. Proven ability to take a project from UI design in Figma to a fully functional, responsive web application.

EXPERIENCE

Frontend Developer | Remote
Project: Stable and Horses Services Management Platform

- Developed a full-featured management platform from concept to deployment using the Angular framework and Spring Boot.
- Engineered dynamic, reusable form components and complex role-based routing to create a seamless and secure user experience for different user privileges.
- designed the UI using Figma template with Angular Reactive Forms.
- Collaborated with back-end developers to consume RESTful APIs, ensuring efficient data exchange and functionality between the front-end and MySQL database.

EDUCATION

Bachelor of Arts in Language Studies (GPA: 3.4)
Arab Open University | El-shorouk City, Egypt

SKILLS

- **Frontend :** Angular, JavaScript (ES6+), TypeScript, HTML5, CSS3, SCSS
- **Backend & Tools :** Node.js, Java, Spring Boot, RESTful APIs
